

## Legend

Trees and planting have been selected to provide interest, colour, seasonality, to increase the local biodiversity and help reduce the Urban Heat Island Effect.

### 1 plaza space

Key features include all-weather shelters, various types of accessible seating and amenities including BBQ facilities, drinking fountain / refill station, bike racks and a curved concrete seating wall.

### 2 kick-about

The central lawn area is to act as an open kickabout space with direct access from perimeter footpaths. Garden beds with a variety of understorey planting and trees frame the open lawn area.

### 3 neighbourhood food bowl

Raised garden bed with edible plants, such as perennial herbs, to provide resources for local residents.

### 4 indigenous food pathway

Garden beds featuring edible indigenous species, providing variety for local residents and an educational opportunity.

### 5 active zone

A multi-generational active zone incorporating static fitness equipment with a natural palette and rubber softfall.

### 6 circular lawn

This zone is designed to integrate with the shelter and provide an additional lawned area.

### 7 supporting infrastructure

Additional seating, drinking fountain and bicycle racks to provide amenity for the active zone.

### 8 entry wall / seating wall

Feature low walls. Can be used for seating and signage.

### 9 nature play

This interactive play space featuring a timber climbing structure, climbing totems, dry creek bed with water element, sand pit, nature inspired fence to road edge, and hardy native planting wall.

### 10 shelter

Additional shelter and seating to provide amenity for the nature play zone.

## Legend

Trees and planting will be selected to provide interest, colour, seasonality, to increase the local biodiversity through a predominate mix of native understorey plants. Planting will tie in to existing streetscape planting along Churchill Road.

### 1 footpaths

Accessible footpath linkages into and out of the development connecting to existing footpaths and pedestrian crossing at the intersection of Churchill Road and Regency Road.

### 2 lawn

Open lawn area for passive recreation.

### 3 seating

DDA compliant seating.

### 4 feature walls

Low feature walls / seating walls to compliment the landscape character of the central reserve.

### 5 entry signage / public art

Opportunity to incorporate an entry statement or public art. The corner reserve will be highly visible from multiple directions at the intersection.

## Legend

Trees and planting have been selected to provide interest, colour, seasonality to increase local biodiversity.

### 1 lawn space

Lawn space along the entrance of the pathway.

### 2 buffer planting

Buffer planting in front of the apartments for privacy from the main pathway.

### 3 entrance pathways

Entrance pathways for apartments.

### 4 footpaths

Accessible footpaths to provide a connection to the Islington Station and shared path along the rail corridor.
